Description

This 2023 Tesla Model 3 Long Range presents an exceptional opportunity with its remarkably low mileage of just 12,000 miles, offering a near new driving experience. As an electric vehicle, it boasts a substantial 78 kWh battery, providing an impressive maximum range of 394 miles when new. This Model 3 is equipped with convenient features such as Pre Conditioning for climate control, Blind Spot Warning to enhance safety, and a Dual Wireless Phone Charger for effortless device charging. Additionally, it includes two 45A USB C ports in the rear console and Brake Disc Wiping for optimal performance. The Long Range variant of the Model 3 is designed for extended journeys, with its 394 mile maximum range indicating superior capability compared to many other electric vehicles. Charging is flexible, taking approximately 12 hours for a full charge at home using a 7kW charger, or a rapid 25 minutes to reach 80% charge at a public charging station. This Tesla also offers generous boot space, making it a practical choice for everyday use and longer trips alike.

Specification
